	NARRATIVE REPORT	[INTERIM	FINAL						
	An inspection visit was made to contractor's facility on 15 Dec. 1964. The contract progress is on or shead of schedule except for one item. The first scanning cylinder was drawn and welded, a process which proved unsuccessful since the cylinder could not be round. The second cylinder, now in progress, is being milled from a large piece of metal.								
	The pre-normalization system will consist of three units 2 tall racks of electronics and one low cabinet containing the scanner mechanism and the operator controls. (The electronic racks contain the 400 primary and secondary filter circuits.) These three units along with the adaptive memory computer, Conflex I, will comprise the total system.								
) 	The contracotr predicts that the entire as 15 Feb. 1965, at which time they will begi program to determine validity of the overa they will require a lot of aerial photogradifferent conditions of shadow, obscuratio preparing to obtain this photography for t	n a four month expendil concept. For this phy of various targent, and orientation.	rimental is program, ets t aken under
